At Daikin, we’re not just in the business of air conditioners. We’re in the business of human comfort. Our passion for designing and engineering smart technologies ensures your comfort levels are maximised.

Daikin’s recognised as an expert in air conditioning. As specialists, air conditioning is all we do. In fact, we’re the only company in the world to make both air conditioners and refrigerants which enables us to deliver air conditioning solutions that are world leading in performance, quality and reliability.
A Daikin ducted system provides discreet air conditioned comfort throughout your entire home. It can be installed in a new home or tailored to suit an existing one, and once installed, only the controller, the return air and discharge grilles are visible inside your home.

A Daikin ducted air conditioner consists of an indoor and outdoor unit and flexible ducting. The indoor unit is concealed out of sight in your ceiling or under the floor, with flexible ducting distributing conditioned air through vents located throughout your home. An outdoor unit is positioned in a discreet location outside your home.

**DAIKIN DUCTED AIR CONDITIONING AT A GLANCE**

- Return air grille with filter to remove household dust
- Indoor unit concealed in the ceiling or under the floor
- Small diameter, concealed refrigerant pipes
- Ducting distributes conditioned air throughout your home
- Up to eight zones can be managed from a single controller
- Outdoor unit
LOCAL AFTER SALES SERVICE AND SUPPORT
Daikin has an established Service Department including an in-house call centre, spare parts division and support centre for all technical inquiries.

DAIKIN EXCEEDS MEPS ENERGY EFFICIENCY REQUIREMENTS
In the interests of increasing the overall air conditioning efficiency, all ducted air conditioners with a cooling capacity of up to 65kW sold in Australia or New Zealand must now comply with the Minimum Energy Performance Standards (MEPS), as set out in Australian and New Zealand Standard 3823.2:2013.

All Daikin air conditioners exceed MEPS requirements, in line with Daikin’s commitment to providing energy efficient, quiet, simple to use and reliable air conditioning solutions.

AUSTRALIAN MADE CERTIFICATION
Through our commitment to expand our local manufacturing capability, Daikin Australia are proud to say that our ducted indoor units* are now Australian Made certified.

A registered certification trademark, the Australian Made logo is Australia’s most trusted, recognised and widely used country of origin symbol, and is underpinned by a third-party accreditation system, which ensures products that carry the logo are certified as ‘genuinely Australian’.

Registered products ensure premium-quality and has met the criteria set out in the Australian Consumer Law and Australian Made, Australian Grown (AMAG) logo Code of Practice.

*Premium Inverter and Inverter range

WHAT IS SEASONAL PERFORMANCE?
In simple terms, the seasonal performance of an air conditioner is defined by its Total Cooling Seasonal Performance Factor (TCSPF)/ Heating Seasonal Performance Factor (HSPF) rating which takes into consideration the local climate where the air conditioner is installed, and the seasonal temperature differences throughout the year.

Since the geography of Australia is large with varying climate conditions, the same product installed in Darwin will perform differently when installed in a capital city further south, such as Sydney or Melbourne.

As a result, the rating system divides the continent into three distinct climate zones (hot, average, and cold), which allows you to easily identify and compare air conditioners within the climatic zone you live in.

The greater the TCSPF/HSPF rating, the more efficient the air conditioner will be.

TCSPF/HSPF refers to the seasonal efficiency of an air conditioner as outlined in the GEMS 2019 Determination
TCSPF: Total Cooling Seasonal Performance Factor as per AS/NZS 3823.4.1:2014
HSPF: Heating Seasonal Performance Factor as per AS/NZS 3823.4.2:2014

For over 90 years, Daikin has invested heavily in Research and Development to deliver more effective climate control for you and your family. Daikin technologies help make Daikin air conditioners energy efficient, powerful, reliable and easy to use.

**DAIKIN TECHNOLOGY**

**INDOOR UNIT**

1. **INDOOR HEAT EXCHANGER**
   Our new indoor heat exchangers have been designed to deliver maximum capacity output in a compact casing size. Through the use of cutting edge technologies, our indoor heat exchangers utilise Ø5mm copper pipes to ensure heat is removed from your home efficiently.

2. **DC FAN MOTOR**
   Daikin indoor units are equipped with a high efficiency DC fan motor. By utilising high power permanent magnets instead of the induced magnetism of conventional AC motors, Daikin's DC motor can deliver significantly higher motor efficiency.

3. **SIROCCO FAN**
   Daikin's ducted units are fitted with light weight single injection moulded Sirocco Fans. These fans feature an aerodynamic fan blade design which reduces turbulence for a more efficient and quieter airflow delivery.

4. **ENHANCED RELIABILITY**
   Designed for the harsh Australian summer. The indoor unit fail safe logic regulates the fan speed on start-up when roof temperatures are at an extreme for enhanced reliability.

**OUTDOOR UNIT**

5. **INVERTER COMPRESSOR**
   Daikin's swing and scroll DC sine wave inverter compressors are quieter and more efficient than conventional compressors, thanks to their high pressure dome construction and the usage of high pressure lubrication oil.

6. **RELUKTANCE DC MOTOR**
   Daikin's Reluctance DC motor utilises the magnetic torque of neodymium magnets in conjunction with reluctance torque, resulting in more energy efficient operation. These neodymium magnets are 10 times stronger than conventional ferrite magnets.

7. **SAW EDGE FAN BLADE**
   The addition of a saw tooth edge at the rear of the blade smooths airflow over the blade surface, reducing turbulence which in turn results in a quieter, more efficient means of delivering comfort to your home.

8. **REFRIGERANT COOLED PCB**
   The heat produced by the inverter PCB module is cooled by a sub heat exchanger*. This provides stable operation, enhanced reliability and continuous operation up to 50°CDB ambient.

---

1. Refrigerant Cooled PCB only applicable to RXA71-160CV1, RXA85-160CV1 & RXA71-160CY1
2. 50°CDB ambient only applicable to RXA71-160CV1

*For Indoor Heat Exchanger only applicable to RXA71-160CV1

---

Ferrite Magnet Neodymium Magnet
PREMIUM INVERTER DUCTED

SUPERIOR ENERGY PERFORMANCE

Engineered with features such as a redesigned Cross-Pass Heat Exchanger on the outdoor unit, DC Fan motor on the indoor unit and Daikin’s patented swing compressor, our new Premium Inverter series takes energy efficiency to the next level.

NIGHT QUIET MODE

Our outdoor units are amongst the quietest on the market. If the noise levels need to be further reduced, engaging the Night Quiet Mode feature will reduce the noise levels by 4dBA**.

R32 REFRIGERANT

R32 is the next generation in refrigerants with a substantially lower ‘Global Warming Potential Factor’ than R410A, providing less risk of harm to the environment*.

AUTOMATIC AIRFLOW ADJUSTMENT

Utilising the DC fan technology on our indoor unit, the Automatic Airflow Adjustment feature ensures the indoor fan operates at the appropriate settings to automatically deliver the optimum airflow to your home always.

DESIGN FLEXIBILITY

The side discharge configuration of the outdoor unit enables convenient installation onto the narrow side access of modern homes. Additionally, the indoor unit can also be separated into 2 sections for easy installation and retrofit into existing homes.

AUSTRALIAN MADE

Premium Inverter Ducted indoor units are specifically designed and manufactured in Sydney, NSW to perform in Australian conditions.

INCREASED OPERATION LIMITS

Built for the harsh Australian climate, the refrigerant cooled PCB technology incorporated in the outdoor unit enables continuous operations up to 50°CDB ambient.

HEATING FOCUS OPTION

Heating Focus models are available in 180, 200 & 250 Class. These models provide improved heating performance at low ambient temperatures, ideal for cold climate zones such as Canberra, Hobart & Melbourne. These models are not R22 retrofit capable.

---

*Applies to 71-160 Class Models
**Outdoor sound levels are determined in an anechoic chamber and may differ once the unit is installed due to ambient conditions
^Strict guidelines apply for R22 Retrofit Capability, please speak to your installer for further information
Note: R32 ducted indoor units must be installed in the ceiling space, it is not to be installed under floor

---
Engineered to deliver a compact and efficient design, the new Inverter series is ideal for installation into the tight roof space of any modern home and now also features R22 retrofit capability^.

**INTEGRAL ENERGY PERFORMANCE**
Adopting advanced technologies such as a DC Fan motor, Cross-Pass Heat Exchanger on the outdoor unit with increased heat exchange area and Daikin’s patented swing compressor our new Inverter series is designed to operate with improved efficiencies throughout the year.

**EXPANDED 3 PHASE RANGE**
Designed for homes with a 3 phase power supply in place, our new R32 Inverter series ensures a simple and convenient installation without the need to worry about unbalanced electrical loads at your electrical distribution board.

**NIGHT QUIET MODE**
Our outdoor units are amongst the quietest in the market. If the noise levels need to be further reduced, engaging the Night Quiet Mode feature will reduce the noise levels by 4dBA*.

**AUTOMATIC AIRFLOW ADJUSTMENT**
Utilising the DC fan technology on our indoor unit, the Automatic Airflow Adjustment feature ensures the indoor fan operates at the appropriate settings to automatically deliver the optimum airflow to your home always.

**SPACE SAVING OUTDOOR UNIT**
The Inverter series outdoor units are more compact than ever before. Models up to 200 Class are now encased in a space saving side discharge outdoor unit, allowing you to place the unit on the side access of your home and not compromise the external appearance of your home.

**COMPACT INDOOR UNIT**
Today’s modern homes are maximising living spaces with higher ceilings causing roof spaces to shrink. Our Inverter series feature compact indoor units with a low profile height of ≤360mm allowing them to fit comfortably into the tight roof space of a modern home.

**AUSTRIALIAN MADE**
Inverter Ducted indoor units are specifically designed and manufactured in Sydney, NSW to perform in Australian conditions.

---

*Outdoor sound levels are determined in an anechoic chamber and may differ once the unit is installed due to ambient conditions

*Only applicable to 50-160 Class, strict guidelines apply for R22 Retrofit Capability, please speak to your installer for further information

**Note:** R32 ducted indoor units must be installed in the ceiling space, it is not to be installed under floor.

R32 REFRIGERANT

R32 is the next generation in refrigerants with a substantially lower ‘Global Warming Potential Factor’ than R410A, providing less risk of harm to the environment.

SUPERIOR DESIGN

With an industry leading compact size (245mm height), DC Fan on the indoor unit with an ESP of 150Pa and a built-in condensate pump with a lift of up to 850mm, the new and improved FBA unit is ideal for applications with tight ceiling spaces. The 75m (100 Class) pipe run also enables greater flexibility in the placement of the outdoor unit.

AUTOMATIC AIRFLOW ADJUSTMENT

Commissioning has never been easier. Automatic Airflow Adjustment feature allows the fan speed to adjust automatically to suit your duct design during commissioning, simplifying the process and saving time.

COMPACT DESIGN

The new and improved FBA series has been designed to meet the construction challenges of modern commercial and medium density apartment development.

R32 REFRIGERANT

R32 is the next generation in refrigerants with a substantially lower ‘Global Warming Potential Factor’ than R410A, providing less risk of harm to the environment.

SUPERIOR DESIGN

With an industry leading compact size (245mm height), DC Fan on the indoor unit with an ESP of 150Pa and a built-in condensate pump with a lift of up to 850mm, the new and improved FBA unit is ideal for applications with tight ceiling spaces. The 75m (100 Class) pipe run also enables greater flexibility in the placement of the outdoor unit.

AUTOMATIC AIRFLOW ADJUSTMENT

Commissioning has never been easier. Automatic Airflow Adjustment feature allows the fan speed to adjust automatically to suit your duct design during commissioning, simplifying the process and saving time.

COMPACT AND LIGHTWEIGHT

The compact form factor and light weight of the FDXS Series makes it suitable for a variety of applications with limited installation space while also being easy to handle during installation.

QUIET OPERATION

The FDXS Series is truly discrete with whisper quiet operations (35dBA on the FDXS 25 Class) to ensure limited impact to internal room acoustics.

FBA SLIMLINE DUCTED

FDXS BULKHEAD SYSTEM

15 SINGLES & THREE PHASE OPTIONS

Note: R32 ducted indoor units must be installed in the ceiling space, it is not to be installed under floor.

5.0kW TO 14.0kW CAPACITY RANGE

2.4kW TO 6.0kW CAPACITY RANGE

4 SINGLE PHASE OPTIONS

R410A MODELS

The FDXS Bulkhead range is the ideal choice for air conditioning areas where a discreet installation is preferred.

The indoor unit fits flush into the ceiling with only the suction air and discharge grilles visible inside your home and leaving maximum floor and wall space for furniture, decoration and fittings.

COMPACT AND LIGHTWEIGHT

The compact form factor and light weight of the FDXS Series makes it suitable for a variety of applications with limited installation space while also being easy to handle during installation.

QUIET OPERATION

The FDXS Series is truly discrete with whisper quiet operations (35dBA on the FDXS 25 Class) to ensure limited impact to internal room acoustics.
At Daikin, we have a range of controllers available to control your ducted air conditioning system to suit your lifestyle needs.

**WHAT IS AIRSIDE CONTROL?**

Daikin’s Airside Control feature delivers conditioned air to your nominated zones more efficiently than ever before. With the typical home divided into separate areas or zones, it makes sense to only air-condition zones that are occupied and to switch unoccupied zones off.

Airside Control takes this one step further, as zones are turned off, the indoor unit fan reduces speed automatically to meet the airflow requirement of the remaining open zones. This action results in comfort where required, quieter operation and greater energy savings.

This feature is only available on Premium Inverter (71-250 Class) and Inverter (50-160 Class) Ducted paired with the Zone Controller.

**ZONAL CONTROLLER (On/Off Control Only)**

**FEATURES**

1. Backlit display with easy-to-read text.
2. Three different timer and time clock operations for precise, programmable control for your home.
3. Countdown On-Off timer, programmable in 1 hour increments for up to 12 hours.
4. A simple 7-day Time Clock, to program the controller to turn the system on or off at set times any day of the week. Two different on and off programs can be set for each day of the week.
5. An advanced 7-day Time Clock extends the functionality of the Simple 7-day Time Clock with advanced features such as Zone Control and Temperature Sensor Selection, for the ultimate in-home comfort.
6. Airside Control when connected with Premium Inverter (71-250 Class) & Inverter (50-160 Class) Ducted models.

**NOTES:**

1. Nav Ease & Zone Controller is only compatible with FDYA(N) & FBA models, FDXS models come standard with a wireless remote controller.
2. Airside Control function regulates the fan RPM between 60% to 100% of the indoor unit’s rated airflow.
3. Airbase is not compatible with Slave Zone Controller.

**NAV EASE CONTROLLER**

**FEATURES**

1. Clear, backlit display with easy-to-read text.
2. Weekly schedule timer, to program on and off times.
3. Home Leave function can turn your air conditioner on automatically when room temperatures drop below 10°C.
4. Quick Cool / Heat mode, which temporarily increases air conditioning power to more rapidly reach your desired operating temperature, before automatically returning to normal operation.
5. Set Temperature Mode Changeover, automatically switches from a cooling to heating cycle, or a heating to cooling cycle at pre-set points.
6. Temperature Limit, to predefine a temperature range for cooling or heating cycles, helping you reduce your energy consumption.

**SPECIFICATION**

- **HxWxD (mm)**: 120x170x24
- **Screen (Diagonal)**: 3.17"
1. DIRECT CONNECTION
For locations without a Wi-Fi network, the app can wirelessly connect directly to a WLAN adaptor equipped air conditioner, when in range.

2. WI-FI CONNECTION
A WLAN adaptor equipped air conditioner can easily be joined to a local Wi-Fi network. Once connected, the system can be controlled from any networked Android or iOS device.

3. INTERNET CONNECTION
Monitor and control your system from virtually anywhere, adjusting temperature and setting for a comfortable environment ready for when you arrive home. With no subscription costs from Daikin, all you need is a permanent internet connection for your Wi-Fi network, and an internet connection for your phone or tablet.
WHY CHOOSE A DAIKIN SPECIALIST DEALER?

Like us, our Dealers are specialists. They know the ups and downs, ins and outs of air conditioning. So their expertise ensures you get the right advice for your needs.

Daikin Specialist Dealers provide custom designed solutions for your home through an in-home quotation. Dealers will not only supply and install the best possible air conditioning solution but will also provide ongoing maintenance to ensure peak efficient performance over the life of the system.

To take the stress out of air conditioning your home, speak to a Daikin Specialist Dealer. With over 450 Specialist Dealers across Australia, our specialists are ready to help you fit the right air conditioning solution for your home.

All appointed Daikin specialist dealers are independently owned and operated businesses.

#### Notes:

1. The Rated Capacity, Power Input and Running Current are measured in accordance with AS/NZS 3823.1.2
2. Cooling: Indoor temp: 27°CDB/19°CWB, Outdoor temp: 35°CDB/24°CWB
3. Heating: Indoor temp: 20°CDB/15°CWB, Outdoor temp: 7°CDB/6°CWB
4. Indoor and outdoor sound levels are determined in an anechoic chamber and may differ once the unit is installed due to ambient conditions
5. R32 ducted indoor units must be installed in the ceiling space, it is not to be installed under floor

1: Only available on New Ease
2: Night Quiet & Night Set modes may reduce capacity
3: Low Noise Operation on required optional PCB
4: Only available on FDYQN180-200LCV1
5: Can be set up by installer during installation
6: Only available on Zone Controller
7: Optional accessory. Be only compatible with New Ease or Zone Controller
8: Only available when connected to FDYQ-TY1

## FEATURES AND BENEFITS

### ENERGY EFFICIENCY

#### INVERTER OPERATION

An inverter system works like the accelerator of a car, gently increasing or decreasing power to steadily maintain your optimum temperature without fluctuations. That means uninterrupted comfort and significant savings on running costs. Daikin premium inverters can also reach your desired temperature faster than conventional air conditioners.

#### AUTOMATIC MODE CHANGEOVER

Automatically selects heating or cooling modes to suit thermostat settings and prevailing room temperature.

#### PREDICTED MEAN VOTE (PMV) CONTROL

Measures indoor and outdoor temperatures to calculate the ideal room temperature, gently adjusting it for the optimum balance between efficiency and comfort.

#### TEMPERATURE LIMIT OPERATIONS

Lets you pre-defined temperature range for cooling or heating, to reduce energy consumption.

### HOME LEAVE

Ideal for cold climates, when activated, home leave turns your air conditioner on automatically when room temperatures drop below 10°C, keeping your home at or above 10°C so it never gets really cold.

### AUTOMATIC FUNCTIONS

#### AUTO RESTART AFTER POWER FAILURE

The air conditioner memorises the settings for mode, airflow, temperature etc. and automatically returns to them when power is restored after a power failure.

#### SELF DIAGNOSTICS WITH DIGITAL DISPLAY

Malfunction codes are displayed on your control panel for fast, easy fault diagnosis and maintenance.

#### ANTI-CORROSION COATING

An anti-corrosion coating on outdoor heat exchangers gives greater resistance to salt damage and atmospheric corrosion.

### DESIGNS COMPACTION

The compact design of Daikin ducted indoor units allows them to be installed in confined areas, and they can also be dismantled for easier installation in tight roof spaces.

### COMFORT CONTROL

#### NIGHT QUIET MODE

Outdoor unit noise is automatically reduced by 3 dB when outdoor temperatures fall more than 6°C from the day’s maximum (set during installation).

#### PROGRAM DRY MODE

In this mode, priority is given to reducing the level of humidity in the room rather than room temperature.

#### INTELLIGENT DEFROST

During heating operation in low ambient temperature conditions, frost can form on the outdoor unit heat exchanger which can reduce your air conditioner’s performance. Daikin’s intelligent defrost system constantly monitors a range of system parameters and temperatures to determine the optimum time to commence a defrost operation for maximum performance in cold conditions.

#### HOT START

Prior to heating, the indoor unit warms to a pre-set temperature before the fan switches on, ensuring only warm air is discharged and eliminating cold drafts.

#### QUICK COOL / HEAT – POWERFUL MODE

This feature temporarily increases power to more rapidly reach your desired room temperature, before automatically returning to normal operation.

### TIMER CONTROL

#### 24 HOUR ON/OFF TIMER

This timer can be pre-set to start and stop at any time within a 24 hour period.

#### NIGHT SET MODE

A timer off circuit gradually adjusts pre-set cooling and heating levels, preventing sudden temperature changes during the night and improving economy.

#### SEVEN DAY TIME CLOCK

This allows you to program your air conditioner to turn on or off at set times for every day of the week.

---

Note: Not all features available on all models – Please refer to checklist on page 30
ENVIRONMENTAL CERTIFICATIONS

Daikin Industries Limited has received ISO 14001 Environmental Certification for the Daikin production facilities listed below. ISO 14001 is an international standard specifying requirement for an environmental management system, enabling an organisation to formulate policy and objectives, taking into account legislative requirements and information about significant environmental impacts. It applies to those environmental aspects within the organisation’s control and over which it can be expected to have an influence.

The certification relates only to the environmental management system and does not constitute any endorsement of the products shipped from the facility by the International Organisation for Standardisation.

AUSTRALIAN MADE CERTIFICATION

Through our commitment to expanded local manufacturing capability, Daikin Australia are proud to say that our ducted indoor units* are now Australian Made certified.

Registered products ensure premium-quality and have met the criteria set out in the Australian Consumer Law and Australian Made, Australian Grown (AMAG) logo Code of Practice.

*Premium Inverter and Inverter range

QUALITY CERTIFICATIONS

Daikin Industries Limited was the first air conditioning equipment manufacturer in Japan to receive ISO 9001 certification. All Daikin manufacturing facilities have been certified to ISO 9001 Quality Management System requirements. ISO 9001 is a certificate for quality assurance concerning ‘design, development, manufacturing, installation and related service’ of products manufactured at that factory.

ENVIRONMENTAL CERTIFICATIONS

Daikin Industries Limited has received ISO 14001 Environmental Certification for the Daikin production facilities listed below. ISO 14001 is an international standard specifying requirement for an environmental management system, enabling an organisation to formulate policy and objectives, taking into account legislative requirements and information about significant environmental impacts. It applies to those environmental aspects within the organisation’s control and over which it can be expected to have an influence.

The certification relates only to the environmental management system and does not constitute any endorsement of the products shipped from the facility by the International Organisation for Standardisation.

AUSTRALIAN MADE CERTIFICATION

Through our commitment to expanded local manufacturing capability, Daikin Australia are proud to say that our ducted indoor units* are now Australian Made certified.

Registered products ensure premium-quality and have met the criteria set out in the Australian Consumer Law and Australian Made, Australian Grown (AMAG) logo Code of Practice.

*Premium Inverter and Inverter range

QUALITY CERTIFICATIONS

Daikin Industries Limited was the first air conditioning equipment manufacturer in Japan to receive ISO 9001 certification. All Daikin manufacturing facilities have been certified to ISO 9001 Quality Management System requirements. ISO 9001 is a certificate for quality assurance concerning ‘design, development, manufacturing, installation and related service’ of products manufactured at that factory.
